

VALIDATION TECHNICIAN CENTER IN LOZORNO

TECHNICAL

The company

Hungry for challenges? Join a group with innovation at its heart and contribute to the automotive revolution!

With 33,000 team members located in 31 countries and a 2016 proforma revenue of €7.5 billion, Plastic Omnium is world leader in its two businesses: automotive and environment.

The Auto Exterior Division is the world leader for the production of body panels and modules. Serving over 70 car manufacturers worldwide, it encompasses 22,000 employees in 83 sites.

Our ambition? Provide automakers with cutting-edge equipment and solutions to develop tomorrow's clean and connected car.

Missions

Technical center in Lozorno is the main engineering center in Central Europe for the Auto Exterior Division. We are developing brand new products for our premium customers. As part of the technical center, you will be working among international teams of engineers specialized in manufacturing processes, in design, in technical purchasing and various other technical functions.

This position is suitable for a young graduate and represents a perfect first step in automotive world! As validation technician you will perform and report validation tests in accordance to validation project plan. Your main tasks will be to:

- Provide fixtures, settings, and preparations of materials (vehicle units, fixtures ...)
- Arrange parts and units before tests and dispose after the tests
- Participates in R&R tests in accordance with laboratory scope
- Analyze the test results and alerts validation engineer in case of non-compliance
- Provide technical solutions to improve the behavior of the product
- Write laboratory test reports
- Be responsible for the cleanliness and proper storage testing means and tools
- Be responsible of test tools and consumables provision
- Develop the testing equipment or tests methods
- Prepare the work instructions
- Manage the storage room (e.g. inventory on regular basis)

Profile

- Engineering degree (specialization in mechanical engineering, or plastic material)
- English – advanced
- Detailed oriented person, manually skilled, willing to grow within our laboratory
